

26
ind. modules, [(42), the modules (42)] each module comprising at least one object [(32,36,40),]; characterized in that the multiplex signal [(12)] further comprises module related object extraction information.

8. (Amended) A multiplex signal [(12)] according to Claim 7, characterized in that the module related object extraction information is contained in a single information section of the transport stream.

REMARKS

The abstract has been rewritten in order to improve the clarity of description of the technical disclosure, and the specification has been amended to include appropriate headings.

The claims have been amended to improve their particularity and to eliminate drawing reference numerals.

Entry hereof is respectfully requested.

Respectfully submitted,
